

# User Manual

## PACMAN MULTIPLAYER

### Menu:

The game menu consists of three options: Play, Mechanics, About and Exit.

- Play

When Play is selected, the player is redirected to another menu where he will select the difficulty of the game. Afterward, the game will now start.

### CONTROLS

The user is given only four input keys to play the game, and those are the arrow keys, for changing Pacman's direction. Pacman already moves in a straight line and so the user only needs to manipulate its direction. Arrow Up to change Pacman's direction to upward, Arrow Down for downward, Arrow Left for left direction, and Arrow Right for right direction.

- Mechanics

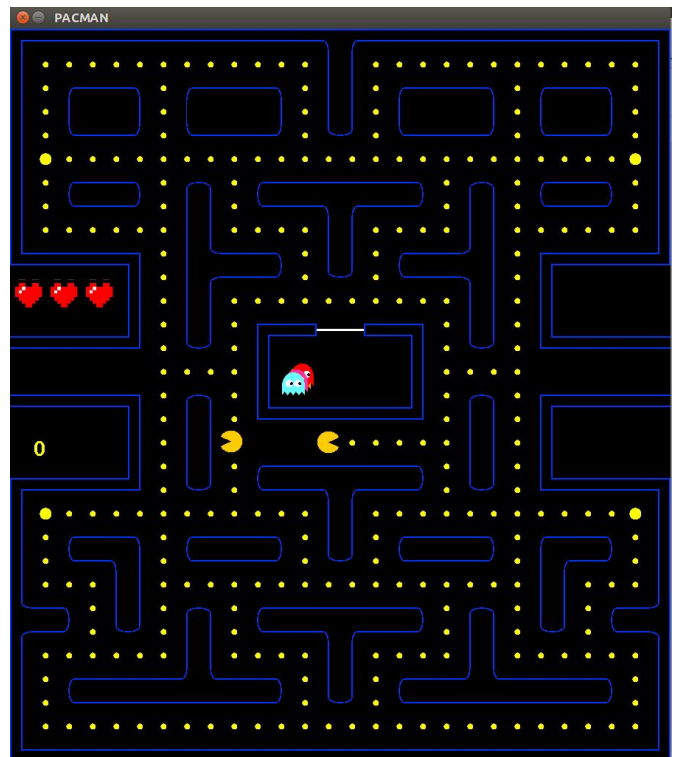

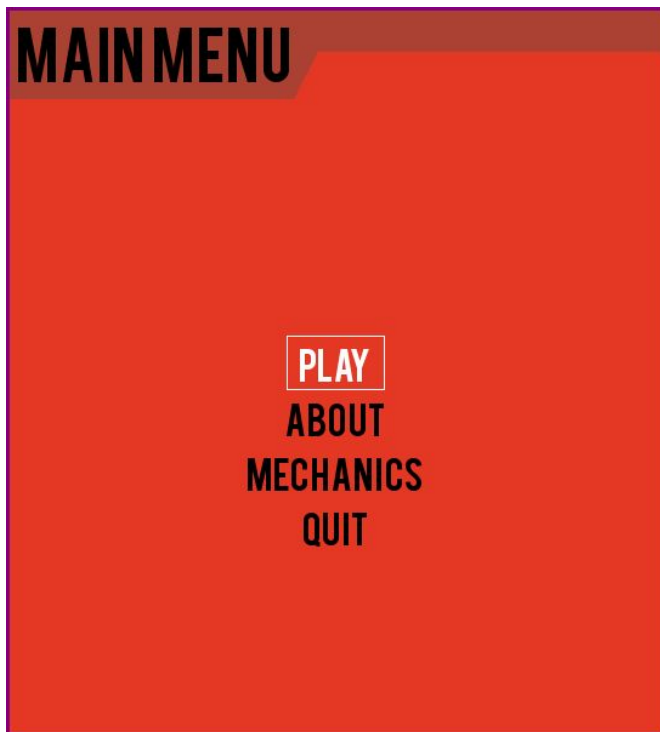

The mechanics of the game is displayed here. Visit the Menu for more information.

- About

The details about the development of the game are displayed here such as the authors and technologies used.

- Exit

Select Exit to cut the communication between the client and the server and to close the game window.
